

IBM Building 323A CP-217 Process East Fishkill, New York

CLIENT/OWNER:
International Business Machines

SCOPE OF WORK:
Process Piping

BUILDING TYPE:
Semiconductor Manufacturing
Plant

PROJECT VALUE:
\$2,000,000

CONTRACT WITH:
The Whiting-Turner Contracting
Company

The project scope for IBM's Microelectronics B/323 Annex Program included a jacket cooling water process system.

Ninety-five percent of this job was prefabricated in Armistead's Newburgh, NY UA certified fabrication shop, resulting in schedule and cost savings. A majority of this project required heavy rigging with multiple crane usage.

The Whiting Turner Contracting Company was the general contractor.
