Process Work
We are noted for our major process work. Depending on the requirements of the project and the industry, we use stainless steel, glass, fiberglass, copper, PVC, Teflon lined piping systems, or whatever piping material is most appropriate for the project at hand.

Fabrication
Piping fabrication is a key component of Armistead’s project management philosophy, and our project teams employ prefabrication whenever possible on all jobs. It not only offers savings to our customers, but also provides us with a competitive edge and scheduling advantages.
