

Mount Saint Mary College Aquinas Hall Newburgh, New York

CLIENT/OWNER:

Mount Saint Mary College

SCOPE OF WORK:

HVAC/Plumbing

BUILDING TYPE:

Education

PROJECT VALUE:

\$5,000,000

CONTRACT WITH:

Barr and Barr, Inc.

Work was completed in January 2008 on the new Aquinas Hall Math and Science Building at Mount Saint Mary College in Newburgh, NY. The science labs included lab gases and hoods.

The front of an existing building was demolished so that the new building could be scabbed on to it. This necessitated that ongoing work be isolated so students did not experience interruption to their class schedules.

All new mechanical systems were transitioned in to the existing systems.

This project was completed three months ahead of schedule and under budget.
