

United Water - Haworth Water Treatment Plant Expansion Haworth, New Jersey

CLIENT/OWNER:

United Water

SCOPE OF WORK:

Process Piping/Plumbing/HVAC

BUILDING TYPE:

Water Treatment Plant

PROJECT VALUE:

\$4,700,000

CONTRACT WITH:

CDM Constructors

Armistead Mechanical performed a process piping upgrade for United Water's 100 million gallon-a-day water treatment plant in Haworth, NJ. Work included

fabricating and installing several thousand feet of stainless steel, ductile iron, PVC and FRP piping systems for the plant's upgrade project. Piping systems included ozone, liquid oxygen, chemical, water, process waste and air systems along with HVAC and Plumbing upgrades.

The installation of new equipment and piping while working around an existing operating plant required close coordination between plant personnel and the construction team.

This state-of-the-art-facility and project was featured in the April 2010 issue of Commerce magazine, published by the Commerce and Industry Association of New Jersey.
